EDUCATION

TEDU

Bachelor's Software Engineering

Ankara, Türkiye

Graduated July 2026

- Secondary Field: Applied Data Analytics
- Advanced Coursework: Completed master's-level Deep Learning and master's-level Reinforcement Learning as an undergraduate student.

CVUT

M.Sc. Applied Informatics

Prague, Czech Republic

Incoming Student, September 2026

PROJECTS & TECHNICAL PUBLICATIONS

Transformer-based Neural Translator | [Medium Publication](#)

- Implemented an encoder-decoder Transformer from scratch for English-to-Azerbaijani machine translation.
- Implemented custom tokenization, multi-head attention, and beam-search decoding.
- Authored analysis on backpropagation mathematics (cross-entropy loss derivatives, SGD optimization)
- Investigated parameter-efficient fine-tuning techniques, including LoRA for large language models.

EXPERIENCE

Full-Stack Developer (React, Node.js, SQLite, REST APIs, JWT)

Eco-Cash | [view](#)

March 2026 – August 2026

- Developed a full-stack event platform using React, Node.js, and SQLite, implementing event discovery, user accounts, and ticketing functionality.
- Integrated secure user authentication and authorization via RESTful APIs and JWT tokens.
- Integrated the epoint.az payment gateway to enable secure online transactions.

Undergraduate Teaching Assistant

TEDU

February 2026– June 2026

- Co-taught an undergraduate course in Deep Learning, independently delivering guest lectures on neural network architectures.
- Designed and stress-tested programming assignments, exam blueprints, and technical grading rubrics to evaluate student performance.
- Collaborated with the lead professor to streamline curriculum delivery and assess undergraduate academic progression.

Front-End Engineer

Esayar

December 2024 – September 2025

- Developed Ebaz, a cross-platform mobile application using React Native, supporting thousands of real estate and automotive listings.
- Implemented advanced search and filtering, improving content discoverability and user experience.
- Integrated secure user authentication and real-time data synchronization via RESTful APIs
- Designed and implemented a conversational chatbot using Gemini 2 Flash, enabling low-latency natural language queries.
- Integrated chatbot with backend REST APIs to perform intent-based filtering and automated data retrieval.
- Collaborated closely with backend developers in an agile, team-based environment.

PROGRAMMING LANGUAGES

Java, Python, JavaScript, C#, SQL

FRAMEWORKS & LIBRARIES

React.js, React Native, Node.js, Express.js

WEB TECHNOLOGIES

HTML, CSS, RESTful APIs

TOOLS & PLATFORMS

Git, Unity, Postman

LANGUAGES

Azerbaijani – Native, English – Fluent (**IELTS Band 8**), Russian – Fluent, Turkish – Proficient
